DETAILED ACTION

Response to Amendment

The amendments to the claims have been entered. Claims 1, 13, and 17 are currently amended.

Response to Arguments

Applicant's arguments, see page 7, line 19 to page 8, line 5, filed February 15, 2005, with respect to claims 1 and 13 have been fully considered and are persuasive. The rejection of claims 1-25 has been withdrawn.

Claim Objections

The amendments to claim 17 overcome the objections made in the previous office action. The objections to the claims are withdrawn.

Allowable Subject Matter

Claims 1-25 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the examiner agrees with the argument that Mann does not teach determining if a unit of text provides context setting information *that is necessary to the meaning of* information encoded further along in the text. Furthermore, none of the prior art of record teaches determining if a unit of text provides context setting information *that is necessary to the meaning of* information encoded further along in the text, and it is not

clear how one could modify Mann to determine if a unit of text provides context setting information *that is necessary to the meaning* of information encoded further along in the text. Therefore, it not have been obvious to one of ordinary skill in the art at the time of invention to modify the teachings of Mann to determine if a unit of text provides context setting information *that is necessary to the meaning* of information encoded further along in the text.
